Election/Restrictions

1. Applicant's amendment filed on 10/24/2005 is acknowledged.
2. Claims 22-41 are pending.
3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

4. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

I. Claims 22-33 and 37-38, directed to a recombinant Fel d 1 fusion product comprising a Fel d 1 chain I, a Fel d 1 chain 2 and a linker selected from a carbon-nitrogen bond or a peptide linker having from 1 to 9 amino acid residues which links the N-terminal amino acid of one chain to the C-terminal amino acid of the other chain, pharmaceutical compositions and kits thereof.

II. Claims 34-36 and 40-41, directed to DNA sequences encoding a recombinant Fel d 1 fusion product comprising a Fel d 1 chain I, a Fel d 1 chain 2 and a linker selected from a carbon-nitrogen bond or a peptide linker having from 1 to 9 amino acid residues which links the

N-terminal amino acid of one chain to the C-terminal amino acid of the other chain III, expression vectors and hosts thereof and a method for making the fusion product.

III. Claim 39, directed to a method for diagnosing cat allergy comprising the step of combining a sample taken from a subject with a recombinant Fel d 1 fusion product comprising a Fel d 1 chain I, a Fel d 1 chain 2 and a linker selected from a carbon-nitrogen bond or a peptide linker having from 1 to 9 amino acid residues which links the N-terminal amino acid of one chain to the C-terminal amino acid of the other chain.

5. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group I was found to have no special technical feature that defines the contribution over the prior art of Vailes et al. (IDS filed on 03/22/2007).

Vailes et al. teaches a recombinant Fel d 1 fusion product comprising a Fel d 1 chain 1 and a Fel d 1 chain 2 wherein the N-terminal amino acid of chain 2 is linked to the C-terminal amino acid of the chain 1 by way of a 19 amino acid linker (In particular, Figure 1, 'Expression of Feld1 in baculovirus-infected insect cells' section on page 758, whole document).

It is noted that the recitation of "a peptide linker having from 1 to 9 amino acid residues" is open language (having) that opens up the claims to include peptide linkers with more than 9

Art Unit: 1644

residues, so long as they have at least 1 to 9 amino acid residues.

Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention. The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
